COLLEGE & UNIVERSITY

FURNISHING IDEAS BY VS.

Furnishing Ideas by VS. VS has been a leading manufacturer of furniture for academic environments for more than a century. Since then, VS has made significant contributions to the design and development of furniture. VS product design includes ergonomics, use of high quality and environmentally friendly materials, and visual design. Thanks to its extensive experience, VS designs products that stand out on account of their durability and high resistance to wear. Significant criteria in the development of VS furniture are not only the fulfillment of the highest quality and ergonomic requirements, but also the consideration of environmental concerns. From the choice of raw-materials to the processing technology and right through to the packing and delivery of the furniture, VS always thinks "green". VS products fulfill or exceed many quality and environmental industry standards such as ANSI BIFMA, ISO 2000:9000, ISO 14001 and GREENGUARD.

This higher education catalog serves as an inspiration for great furnishing solutions for classroom, administration, specialized rooms and common areas.
